

# Video Instructions

All speakers at RecSys 2025 are invited to optionally provide a 2-minute video summarizing the contributions of their work. This video will be published together with the final version of the contribution in the ACM Digital Library, before the event.

To submit your video, please use the following link:

<https://cms.acm.org/artifactSubmission/fileUpload.cfm?parent=5056550502>. You will see the form depicted below.

ACM Artifact Submissions - Proceedings of the Nineteenth ACM Conference on Recommender Systems

Paper DOI:

Your Name:

Your Email:

Name of artifact:

Artifact type:

Description:   
(1,024 characters remaining)

License:   
( optional )

Enter a URL instead

Please make sure that your video does not exceed the 2-minute limit.

You will need your DOI as assigned to you during the ACM rights review process to upload this video (in the form: 10.1145/XXXXXX.XXXXXX). Do not use the “https://doi.org” part. You can find the DOI in the confirmation email from ACM rights review or at the bottom of the ACM copyright block on the first page of your pdf submission.

In the field “Artifact type”, select “Video”. You are expected to provide a very short description of your presentation video. This is limited to 1,024 characters, including spaces. If your description exceeds this character count, it will be ignored and “Presentation Video” will be used as the default description by ACM for the Digital Library. Please be aware that as per [ACM Digital Recordings Requirements policy](#), all content captured is owned by ACM and may not be distributed by other means unless explicit permission is granted by ACM.

Upload your single video file, DOI, and short description to the video submission site by **August 11** (23:59 AoE (Anywhere on Earth)).

When creating your video, please follow these technical requirements:

- Preferred resolution: 1080p (HD), but 720p is acceptable.
- Format: .mp4 or .m4v, optimized for streaming.
- Video codec: H.264; Audio codec: AAC+ or AAC; MPEG4 PART 10 or AVC. (See the [requirements page](#) for details.)
- We recommend using Zoom for recording.
- Audio and video must remain in sync throughout.
- It is preferred to include a picture-in-picture window showing the presenter throughout the video.
